

CONVEYOR BELTS FOR SUGAR PROCESSING

CONVEYOR BELTING

Bulk Sugar Conveying

Our “E” series belts are designed from an FDA PVC that is resistant to abrasion, antistatic, fire-retardant and flexible for use on troughed conveyors. Belt types **E21.20.10**, and **E31.20.10** are specially designed according to strict DIN-ISO AFNOR norms.

Sugar Bagging & Packaging

Various conveyor belt types are available to convey sugar in the packaging area of the process. Belt types **U19**, and **U20** are suitable for handling smaller bags. For heavier bags weighing over 50kgs we recommend using our **U31**, a heavy duty 3 ply PVC belt with very good abrasion resistance.

Incline Conveying

Various belt types of belting featuring a rough top or “grip” profile embossed on the top cover are available.
